## Education

|                                                                                                                                                             |                       |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------|
| <b>Gwangju Institute of Science and Technology (GIST)</b><br><i>M.S. in AI Convergence / Data Science Lab, advised by Prof. Sundong Kim</i><br>GPA: 4.5/4.5 | Mar. 2025 – Present   |
| <b>Gwangju Institute of Science and Technology (GIST)</b><br><i>B.S. in Electrical Engineering and Computer Science</i><br>GPA: 3.99/4.5                    | Mar. 2019 – Feb. 2025 |
| <b>University of California, Berkeley</b><br><i>Exchange Student, Summer Session</i><br>GPA: 3.50/4.0                                                       | Jun. 2023 – Aug. 2023 |
| <b>Incheon Science High School (인천과학고등학교)</b><br><i>Science-Specialized High School Diploma, Early Graduation (2 years)</i>                                 | Mar. 2017 – Feb. 2019 |

## Funding & Scholarship

|                                                                                                                                                                                      |                       |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------|
| <b>National Research Foundation of Korea Funding, NRF</b><br>· Awarded research funding of ₩12,000,000 as a master's student through the National Research Foundation of Korea (NRF) | Sep. 2025 – Aug. 2026 |
| <b>Korean Government Scholarships, GIST College</b><br>· Scholarship awarded to graduate students studying at GIST                                                                   | Mar. 2025 – Present   |
| <b>Korean Government Scholarships, GIST College</b><br>· Scholarship awarded to undergraduate students studying at GIST                                                              | Mar. 2019 – Feb. 2025 |
| <b>Scholarship for Summer Session Abroad (UC Berkeley)</b><br>· Scholarship awarded to students studying abroad during a summer session                                              | Jun. 2023 – Aug. 2023 |

## Activities

|                                                                                                                                                                                                                                                                                                                                                               |                         |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------|
| <b>TAIC'26: Thinking about AI's Capability – Operations Staff</b><br><i>Supported logistics and on-site operations for TAIC'26, a workshop hosted by our lab (GIST Data Science Lab) held just before ICML 2026</i>                                                                                                                                           | Jul. 2026               |
| <b>GIST AI Graduate School Open Lab – Lab Presenter</b><br><i>Introduced our lab's research to prospective students at GIST AI Graduate School's recurring Open Lab sessions, across four semesters (Fall 2024, Spring 2025, Fall 2025, Spring 2026)</i>                                                                                                      | Fall 2024 – Spring 2026 |
| <b>GIST Global Internship Program (GIP) – Mentor</b><br><i>Mentored an international intern from overseas for 2 months</i>                                                                                                                                                                                                                                    | Jun. 2025 – Aug. 2025   |
| <b>2025 Korea Science &amp; Technology Grand Fair (대한민국과학기술대전) – Booth Staff</b><br><i>Staffed our lab's exhibition booth and introduced our lab's research areas to expo visitors</i>                                                                                                                                                                        | Apr. 2025               |
| <b>GIST Summer Undergraduate Research Fellowship (G-SURF) – Researcher</b><br><i>Researched latent space representations in offline RL (VAE/LDCQ) under Prof. Sundong Kim and Jaehyun Park, GIST Data Science Lab; presented at a joint research symposium with Korea University and KAIST (Nov. 2024), which developed into my current M.S. thesis topic</i> | Jun. 2024 – Aug. 2024   |

## Patents

|                                                                                                                                                                                                                                                                                                                                                                            |           |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------|
| <b>[특허출원] 오프라인 강화학습을 위한 규칙 기반 합성 데이터 생성 방법 및 시스템</b><br>· Co-inventor (20% share) on a domestic Korean patent application by the GIST Industry-Academic Cooperation Foundation (Application No. 10-2025-0148978), for a rule-based method and system for synthetically generating offline RL training data; applied to trajectory dataset construction for the ARC project | Oct. 2025 |
| <b>[특허출원] 적응적 재평가 기반 실행 시스템 및 이의 제어 방법, 그리고 적응적 재평가 기반 실행 시스템의 학습 방법</b>                                                                                                                                                                                                                                                                                                   | Oct. 2025 |

· Co-inventor (25% share) on a domestic Korean patent application by the GIST Industry-Academic Cooperation Foundation (Application No. 10-2025-0148979), for a system and training method that adaptively determines when to re-evaluate an execution plan in long-horizon decision-making
